

GeoCat is a young, innovative and growing international company. We have a unique market position in the world of geographic information sharing. Our highly qualified team assists governments around the world with technologies and knowledge that help to share their data following international standards. Our passion is sharing, collaborating in a global community, sustainable development, open source software, competition on quality and above all, we love maps.

Within our company there is a vacancy for the position of:

Technical System Administrator of a Linux/Java/Tomcat environment

Job description

Result oriented system administrator with a passion for open source software. As system administrator you are responsible for the maintenance of complex environments. This is done according to preset service levels to ensure uninterrupted operation of the system. You participate in the maintenance of software, you are responsible for the existing infrastructure and the deployment of new applications. You have an active role in analysing and preventing problems and disruptions as they occur and of course in resolving them. It is important that you can communicate at every level within an organization. Incidentally you can be asked to work outside of office hours.

Expertise requirements

- Education level: Bachelor or Master degree
- Minimum of 3 years of working experience with maintenance of Java applications
- Experience with the roll-out of Linux / Tomcat environments following continuous delivery principles
- Thorough knowledge of platforms such as Docker, Cloud Foundry en OpenShift
- Open source minded
- Language skills: totally fluent English and/or Dutch
- Knowledge of JavaScript, GitHub, Oracle, geographic information software such as GeoServer, GeoNetwork, OpenLayers and AngularJS, OGC standards and SEO is preferable
- Affinity with maps, sharing geographic information and sustainable development is also preferable

Our offer

GeoCat offers a full time job (40 hours) in a dynamic working environment starting as soon as possible. We invest in opportunities for growth as a company and in our employees. We offer a remuneration package in balance with your level of experience. You will be based in Delft, The Netherlands but willingness to travel is a must.
